

Digital Duprinters range:

Duplo Duprinters are computer-linkable, ink-based printers engineered for high-volume document duplication. Best described as a photocopier/printing-press hybrid; they combine the appearance, useability and functions of a photocopier with the print speed of a litho press. They are most economical on print runs of 30-5000 prints with a cost-per-copy that actually falls as the run-length increases!

Duplo Duprinter DP-460H

[product details ▶](#)

The Duplo DP-460H is the only suction fed digital Duprinter in the world. It is loaded with features including a 3000 sheet A3 deep pile feeder, offset stacking unit, computer interface, book scanning top and the highest resolution available.

Duplo Duprinter DP-C100

[product details ▶](#)
