

Megastar™ 53419

Punching blocks

### Plastic comb binding

Block	
Pitch	14,28 mm
Punching capacity	35 sheets A4 - 80 g/m <sup>2</sup>
Description	Rectangular holes - 3 x 8 mm with all releasable punching dies and adjustable punching margin.
References	<b>53420</b>

### Wire binding

Pitch	12,7 mm - 2:1"	8,47 mm - 3:1"	8,47 mm - 3:1"
Punching capacity	30 sheets A4 - 80 g/m <sup>2</sup>	30 sheets A4 - 80 g/m <sup>2</sup>	30 sheets A4 - 80 g/m <sup>2</sup>
Description	Round holes - ø 6 mm with releasable punching dies and adjustable punching margin.	Round holes - ø 4 mm with all releasable punching dies and adjustable punching margin.	Round holes - ø 4 mm with thumbcut and releasable punching dies. For calendars.
References	<b>53424</b>	<b>53422</b>	<b>53423</b>

### Coil binding

Pitch	6,35 mm - 4:1" / 5 mm
Punching capacity	30 sheets A4 - 80 g/m <sup>2</sup> / 30 sheets A4 - 80 g/m <sup>2</sup>
Description	For plastic coil. Round holes - ø 4 mm with releasable punching dies and adjustable punching margin. / For metal coil. Round holes - ø 3,2 mm with releasable punching dies and adjustable punching margin.
References	<b>53427</b> / <b>53426</b>

### Universal punching

Pitch	
Punching capacity	30 sheets A4 - 80 g/m <sup>2</sup>
Description	Universal A4 punch for ring binders and archiving systems.
References	<b>53429</b>

### Binding machine

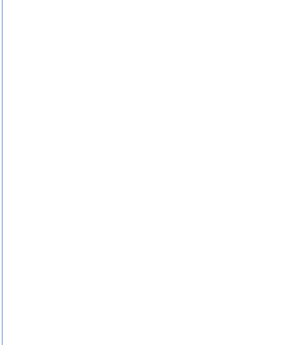

Pitch	14,28 mm
Binding capacity	From 2 to 450 sheets - 80 g/m <sup>2</sup>
Designation	Binding machine for plastic bindings of 4,5 to 51 mm 3/16" to 2" diameter.
References	<b>53421</b>

Pitch	12,7 mm - 2:1"	8,47 mm - 3:1"	14,28 mm - 9:16"
Binding capacity	From 2 to 450 sheets 80 g/m <sup>2</sup>		
Designation	Binding machines for wire binding elements of ø 4,8 mm to 32 mm Adjustable closing of the wire.		
References	<b>53448</b>		

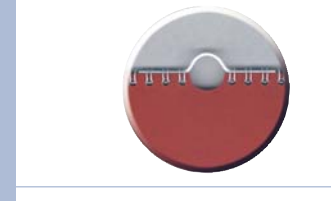

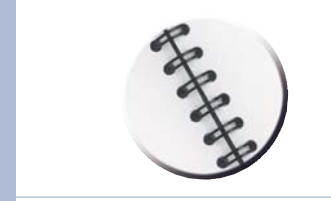

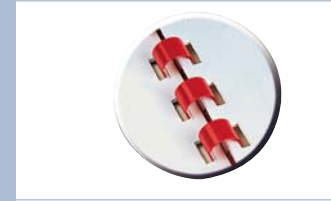

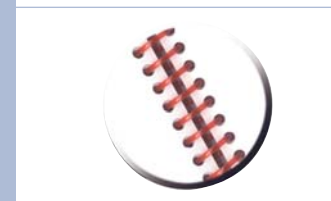

### Plateau de taquage

Designation	Jogging plate of the punched sheets for coils.
References	<b>53428</b>

# MEGASTAR™

High capacity electrical punching and binding machine with integrated, interchangeable or separate binding elements. For all your document binding needs in formats up to 42 cm or 16 1/2".

The Megastar™ has been specially developed for all professional high volume and specific binding requirements, and offers exceptional performance allowing for gains in productivity and efficiency.

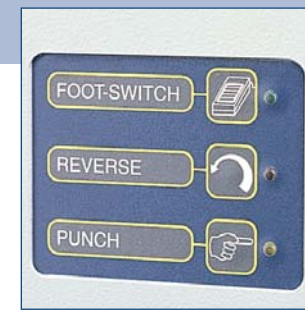

Suitable for a wide variety of paper sizes up to 42 cm (16 1/2"), the Megastar™ offers a choice amongst 7 different binding systems, as well as all of the necessary features and functions required for intensive use. It is a perfect tool for reprographic centers and, or integrated printers, and can be used either as one unit or in two working stations to increase efficiency and productivity by separating the binding unit from the punching unit.

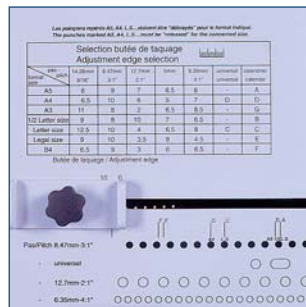

› A powerful engine and a sturdy structure allow punching of 30 to 35 sheets A4 80g at a time for comb binding.

› Releasable punching dies enable the centering and punching of all paper sizes.

› The centralised control panel allows pedal or digital punching control as well as reverse gear in the event of blockages or overloading of sheets of paper.

› The adjustable jogger stop allows the punching of standard document sizes or the centering of non-standard sizes.

› The number of pages to be punched and bound can be measured with the thickness guide in order to determine the proper diameter of the binding element.

› General use : the comb binding lever can be placed on the right or left hand side.

› A unique feature for electric punching machines with interchangeable tools, the punching margin can be adjusted. It guarantees improved strength of bound sheets, essential for large documents.

› The paper cutting compartment can hold a large quantity of "confettis" and is easily opened from the front.

› Punching with a foot pedal leaves hands free for maximum efficiency and productivity.

› The stand is fitted with self-locking casters so the Megastar™ is totally stable, yet can be made mobile when the casters are released.

› Oversized documents (above 42 cm) can be punched as the punching elements are opened on both sides.

› The preset comb opening element facilitates efficient high volume binding.

› Two trays are available on both the left and right sides of the machine, so documents to be punched and bound are within reach.
