

**Binding glue adhesive includes 'Planatol' / 'Planax' including:**

- **PLANATOL BB (Superior)** - Universally applicable dispersion glue for all manual gluing jobs involving absorbent materials (paper, card-board, board, fabrics etc.).
- **PLANATOL FF** - Dispersion glue. Formsets can be easily separated from the pad without falling apart.
- **PLANATOL FF54, FF55, FF60** - Dispersion glues for copying papers like NCR, CCP, Idem, Köhler etc. Also usable for formsets containing an SM paper top sheet followed by SC paper sheets.
- **PLANATOL PERFECT BINDING GLUE** - hot-melt glues for perfect-binding machines.

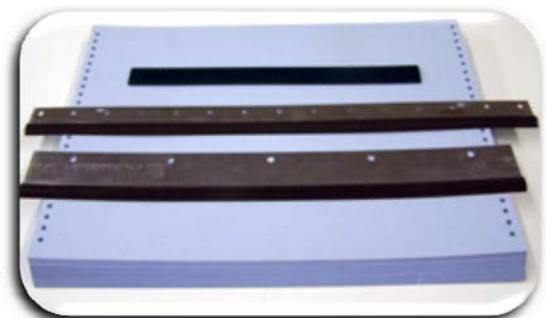

**Wipes**

Tork Range  
Cotton Pads / Rolls  
Webril Wipes  
Webril Pre-Moisten Wipes  
Nubtex Cloths (Packs or Rolls)

**Wash Up Sheets & Blades**

All Sizes Available

**Handcleaner**

Hand Cleaner  
Glove Disposable  
Nitrile Gloves

**Blankets**

Blankets – QL blueprint & Kinyo  
1.68mm, 2.58mm and Barring available.  
Under Blankets - 1.mm  
Packing - Film, Self Adhesive All sizes  
Stick on Blankets  
Smash Blanket Fix

## Risograph & Duprinter Print Copiers

- **Fast Digital Printing System**
- **High Quality Output**
- **Economical**

- Genuine Risograph Branded Ink & Riso Master Roll Supplies
- Copier Duprinters

Designed to be used with the ease of a photocopier but with a far superior speed and economy. These versatile machines can produce documents from originals up to A3 size.

A computer interface option on some machines means it is possible for computer generated information to be downloaded directly to the machine.

Please also view our range of Copier Duprinters, which provide the middle ground between high volume photocopiers and single colour offset presses. They are simple to use, cost-effective and environmentally friendly.

We supply a wide range of consumables for Risograph machines. View our SPECIAL OFFER PRICES on ink and masters.

## **Founts**

Varn Pressmaster  
Varn Silver Fount  
Varn VSP 401  
Agfa G648c  
Agfa G471c  
Agfa G641 Additive  
VanSon 2020  
Rota Blue  
Electrostatic Solution  
IPA (Isopropyl alcohol)  
Deionised Water

## **Kimoto**

Kimoto Plates  
Kimoto Ribbons  
Kimoto Deletion Pens

## Inks & Additives

- Dense Black Ink
- Pantone Basic Colours
- Process Colours
- PMS Mixes
- PMS Colour Matching
- Gold & Silver Inks
- Metallic Inks
- Laser Inks
- Rubber Base Inks
- Varnish
- Sonabase
- Tack Reducer
- Dry Paste
- Pantone Guides
- VanSon Inks

## Pantone Books & Guides

## Image Setting Film

- Kodak GEN5 Film
- Kodak RA2000 Dev
- Kodak RA3000 Fix
- Rapid Access Dev (Concentrate)
- Rapid Access Fix (Concentrate)
- Also available in Ready to Use
- Algae-Go Water Treatment
- Red Litho Tape
- Presept Tables
- Scalpels and Blades

## Metal Plates

- Kodak Classic Positive Plates
- Fuji FNS Negative Plates
- Fuji Positive Plates
- Fuji Pro T Plates , LPNV
- Kodak Winner Negative Plates
- Conventional and CTP plates
- Kodak Classic Positive Plates
- Agfa Lithostar Ctp Plates
- also available
- Foils

## Super Blue Nets

anti marking cloths

## Anti-marking Material

For web and sheet-fed presses. Herco Grater Wrap, AMCT film, Super Blue available

## **HYTON Dampener / Damper Covers**

We have a range of Damper Covers available including HYTON Dampener Covers, which are manufactured using specially processed continuous filament rayon yarns. The fibers in HYTON covers are naturally more ink resistant than cotton knit or molleton materials. This construction produces a superior dampener cover that will run significantly cleaner and provide longer cover life.

Our Hyton covers include the following:

**RED 1 Shrink Dampener Cover (RF11 / RF21):** Shrinks uniformly and locks firmly on to the roller avoiding any twisting or creeping, even under high speed conditions. A clean, even transfer of water to the plate is easily achieved giving consistent dampening at all times. The cover is lint-free, long wearing and easy to clean.

**VIP Form Cover:** Made for small offset machines and duplicators, the covers are elasticated to provide a simple, quick and easy fit.

For use on:

- Multilith - 1250, 1250W, 1250N, 1275, 1275W, 1279, 2550W, 2560, 2650, 2675, 2850, 2875, 2975.
- Davidson - 221, 225, 241, 251, 400, 420, 500, 501, 502.
- A.T.F. - Chief 15, 17, Mark I.
- Itek - 1115, 1117.
- Hamada - 500.
- Townsend - T51 units for above equipment.

**D600 Dampener Cover:** Made for small offset machines and duplicators, the covers are elasticated to provide a simple, quick and easy fit.

For use on:

- Hamada - 600, 500 CDA.

## **Sliver Master**

Silver Master Material  
(Polyester & Paper  
Activator  
Stabiliser  
Deletion Pens

## **Finishing**

Guillotine Knives  
Cutting Sticks  
Paper Drill Bits  
Drilling Pads  
Staples  
Stitcher Wire  
Padding Glue  
Glue Brushes  
Fanapart  
Folding Bone  
Laminating Pouches  
Thermograph Powder  
Spine Tape

Ink Repellent for Cylinders  
Suckers  
Sheet Separators  
Cylinder Jackets  
Varn Seals and Cleaning Seals

**Laser Product**     Platemaker Plates & Toners  
Laser Matt Film, Clear Film

### **Ink Duct Foils.**

Our ink duct foils for Heidelberg presses with C.P.C. are manufactured from a unique polyester containing outstanding chemical, thermal and mechanical properties. Only virgin resin used, no recycled polyester. An exact fit and long lasting durability are assured. All liners are 0.19mm thick. Also available for Rutherford, Polytype, Kase Concord and Van Dam presses.

### **Plastic Ink Spatulas.**

Set of four spatulas, in Blue, Red, Yellow and Black. Available in two popular sizes.

### **Protective Underlay Foil CPC Bi-Adhesive.**

A two-band bi-adhesive for placement under the ink duct foil. Packed in a convenient clear plastic box for safe storage.

### **Sheet Separators.**

Flat sheet separators for Heidelberg presses

### **Automatic Blanket Cleaning Cloth.**

A lint free, engineered to meet cleaning requirements of automatic blankets. Has a hydroentangled polyester layer for added strength. It's excellent absorbency properties to accommodate even low VOC washes.

### **Paper Wedges.**

Paper wedges are used to ensure accurate levelling of paper stack and assist in the proper jogging of the paper. Made of high impact styrene these wedges are oblivious to oil, inks or dirt.

### **Alcohol Testers**

From Litho Research use floating ball measurement to give accurate reading although using less than 15 cc of solution. Two types are available, offering wide (0-28%) and narrow range (0-12%) measurement.

### **Scobe Ink Mixing Scales**

are precise to within 0.1g. Different models available.
