for business forms
and envelopes*

ROYAL DUTCH PRINTING INK FACTORIES VAN SON

ROTASON

*Especially formulated ink
for business forms
and envelopes*

Rotason inks have been specially developed for printing business forms and envelopes on high-speed offset presses. This ink offers fast setting on uncoated paper and is fully overnight. The outstanding press stability Rotason inks, especially at high speeds, guarantees smooth and problem-free printing. Rotason does not dry on the rollers or in the duct. Washing or spraying is not required during long down times of the press.

Rotason inks are also economical, they do not dry in the can, so therefore no skin and loss of ink. The series is available from stock in the PANTONE® Basic colours, Process colours and an Intense black. Rotason! An superior offset ink with the unique combination of fast setting and outstanding press stability on high-speed presses.

Rotason Properties

- Outstanding press stability
- Very fast setting
- Fully overnight
- No skinning
- Drying by absorption

Printing presses

Rotason inks have been specially developed for single and multicolour offset presses with a separate or integrated ink/damping solution system. The inks are particularly suitable for high-speed continuous form and envelope presses.

Plates

Rotason inks are most suitable for use in combination with metal plates. This makes it possible to print with minimal damping, which improves the drying time of the ink.

Substrates

Rotason is only suitable for uncoated paper types.

Colour range

The table states all the Rotason colours which are available from stock. In addition, Van Son's Special Colour Service can supply all colours from the PANTONE® colour guide, or special matches from your own colour sample.
